# 1. Executive Summary & Brand Visual Identity

**OneDestiny** is an elite event and celebration marketplace bridging discerning event hosts with certified top-tier vendors across weddings, corporate galas, private celebrations, photography, venue bookings, catering, luxury transportation, and entertainment.

## Brand Color Tokens

| Color Name | Hex Code | RGB Value | Role / Application |
|---|---|---|---|
| **Imperial Burgundy** | `#6B1028` | `RGB(107, 16, 40)` | Primary brand color, luxury app bars, primary CTA buttons, active accents. |
| **Dark Burgundy** | `#30040E` | `RGB(48, 4, 14)` | Splash screen gradient origin, bottom navigation active pill container. |
| **Champagne Gold** | `#D4AF37` | `RGB(212, 175, 55)` | Metallic brand typography, star emblem, borders, icons, rating badges. |
| **Warm Ivory** | `#FFFDF9` | `RGB(255, 253, 249)` | Light mode canvas, surface cards, and modal background surfaces. |
| **Obsidian Black** | `#121212` | `RGB(18, 18, 18)` | OLED dark mode surfaces, high contrast cards, and luxury header in dark mode. |

## Brand Emblem Specifications

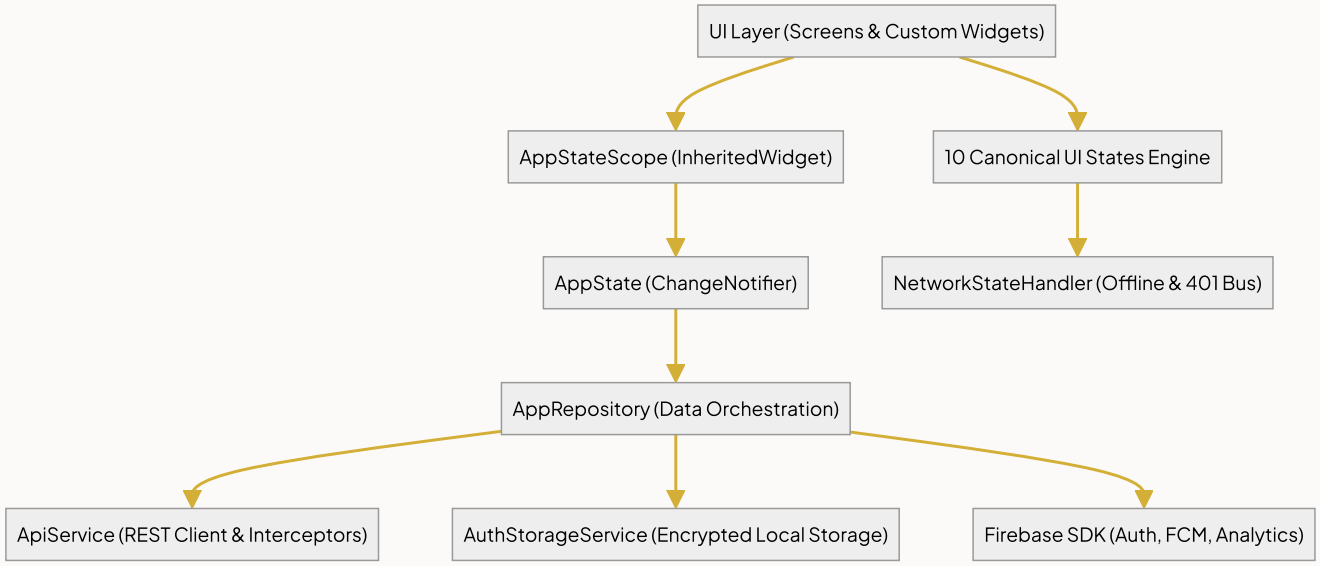

The official OneDestiny emblem features a 3D beveled infinity motif signifying eternal celebratory memories. At the nexus of the emblem sits a four-pointed radiant celebration star. The typography uses a refined high-contrast serif typeface, anchored by symmetrical gold decorative flanking rules framing the core slogan: *"MAKE EVERY CELEBRATION IN ONE PLACE"*.

> **Antialiasing & Asset Edge Purity:** All brand assets undergo 5×5 spatial Gaussian smoothing, cubic Hermite S-curve alpha interpolation, and color inpainting/dilation to eliminate halos, ensuring crisp rendering across burgundy, white, and black surfaces.

# 2. Technical Architecture & Engineering Stack

OneDestiny is engineered following a clean, modular, feature-first architecture that strictly isolates the presentation layer, application business logic, repositories, and platform services.

### System Layered Architecture

## Core Engineering Technologies

| Layer | Technology | Description & Responsibilities |
|---|---|---|
| **Framework** | Flutter SDK (Dart 3.x) | Universal multiplatform codebase powering Android, iOS, and Web. |
| **State Management** | `AppStateScope` & `AppState` | Decoupled reactive state with zero third-party boilerplate. |
| **Networking** | `ApiService` + Dio / HTTP | Automated Bearer token injection, retry mechanisms, and error sanitization. |
| **Persistence** | `AuthStorageService` | Secure storage for session tokens, user profile, and cached bookmarks. |
| **Cloud & Notifications** | Firebase Core & FCM | Cloud messaging, analytics telemetry, and phone auth verification. |

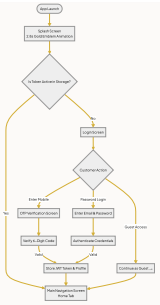

# 3. The 10 Canonical UI States Architecture

To deliver a resilient, ultra-luxury experience, OneDestiny enforces 10 canonical UI states across all user-facing surfaces. No screen presents a blank canvas or uncaught exception.

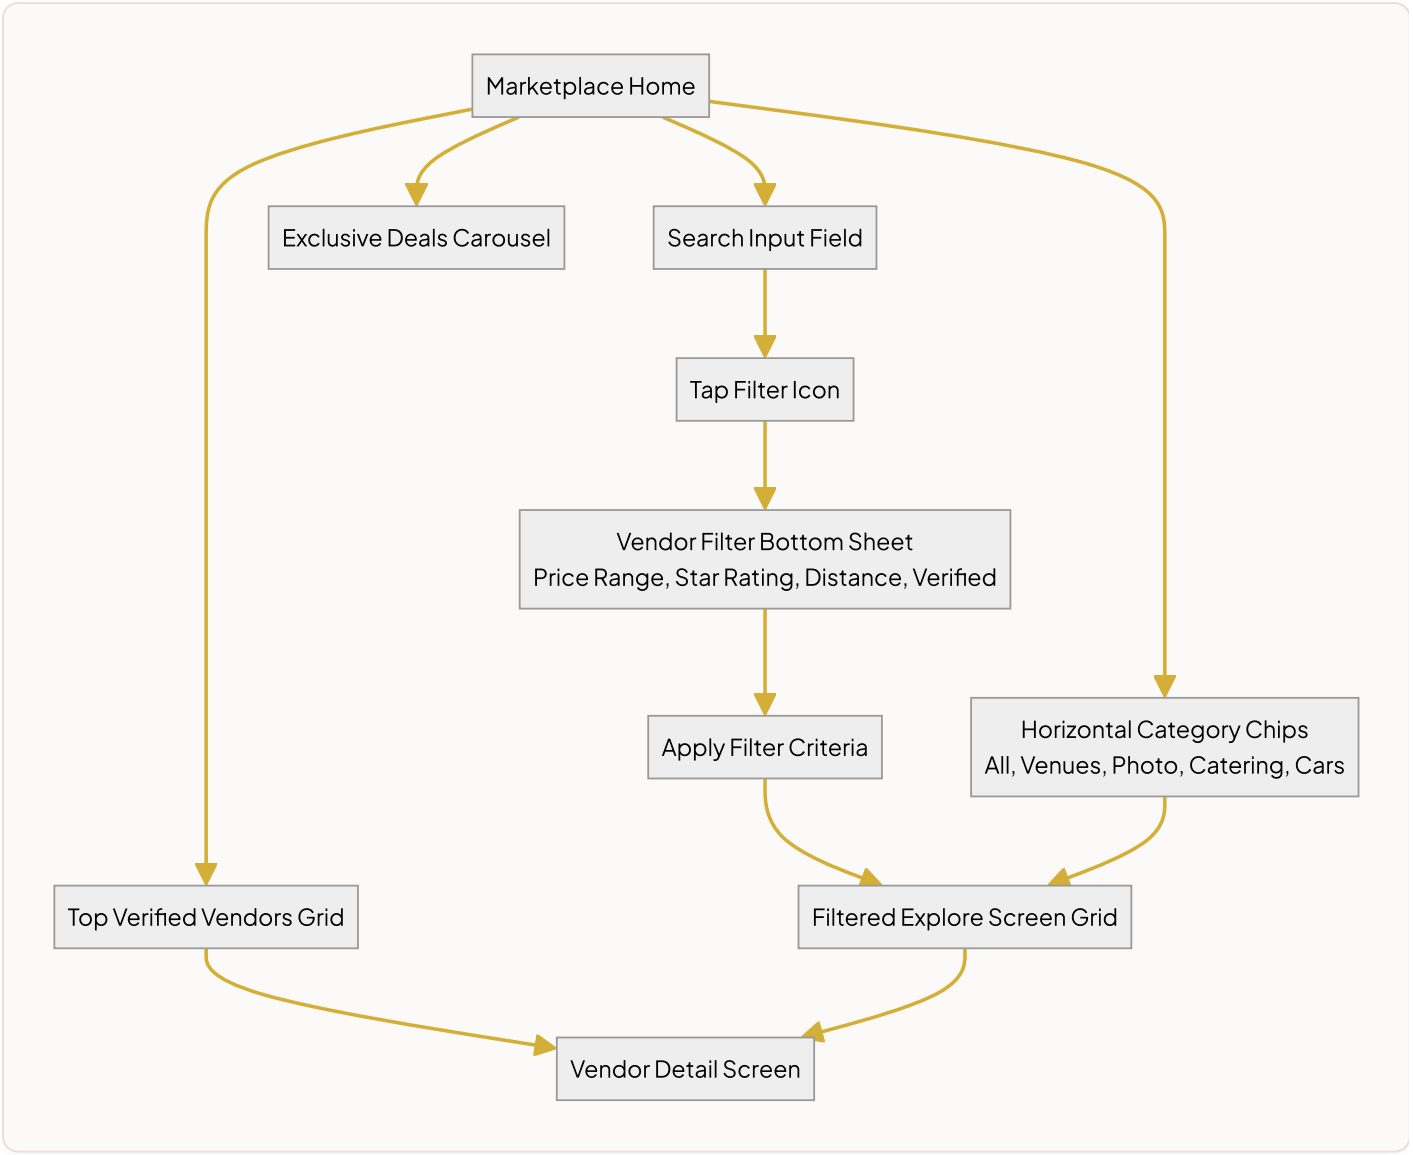

| # | State Name | Component | Behavior & Design Treatment |
|---|---|---|---|
| 1 | **Empty State** | `EmptyStateWidget` | Contextual gold illustration, explanatory copy, and direct navigation CTA. |
| 2 | **Loading State** | `SkeletonLoaderCard` | Smooth gradient shimmer pulses matching the exact layout of loaded cards. |
| 3 | **Error State** | `ErrorStateCard` | Human-readable error sanitization with a debounced "Try Again" trigger. |
| 4 | **Offline State** | `OfflineBanner` / `NoInternetWidget` | Custom 2D vector graphic with automated reconnect listener. |
| 5 | **Slow Network** | `SlowNetworkNotice` | Non-blocking amber banner advising the customer of high latency. |
| 6 | **No Search Results** | `NoResultsStateWidget` | Displays queried term with suggestion pills and "Clear Filters" CTA. |
| 7 | **Permission Denied** | `PermissionDeniedWidget` | Explains rationale for Location or Notifications with deep links to settings. |
| 8 | **Session Expired** | `SessionExpiredDialog` | Non-dismissible luxury modal for HTTP 401s; flushes tokens and redirects to Login. |
| 9 | **Form Validation** | `FormFieldFeedback` | Real-time input outline transition to Crimson Red (`#E53935`) with inline hints. |
| 10 | **Success State** | `SuccessStateWidget` | Spring-animated luxury checkmark with confirmation details and return action. |

# 4. Application User Flows

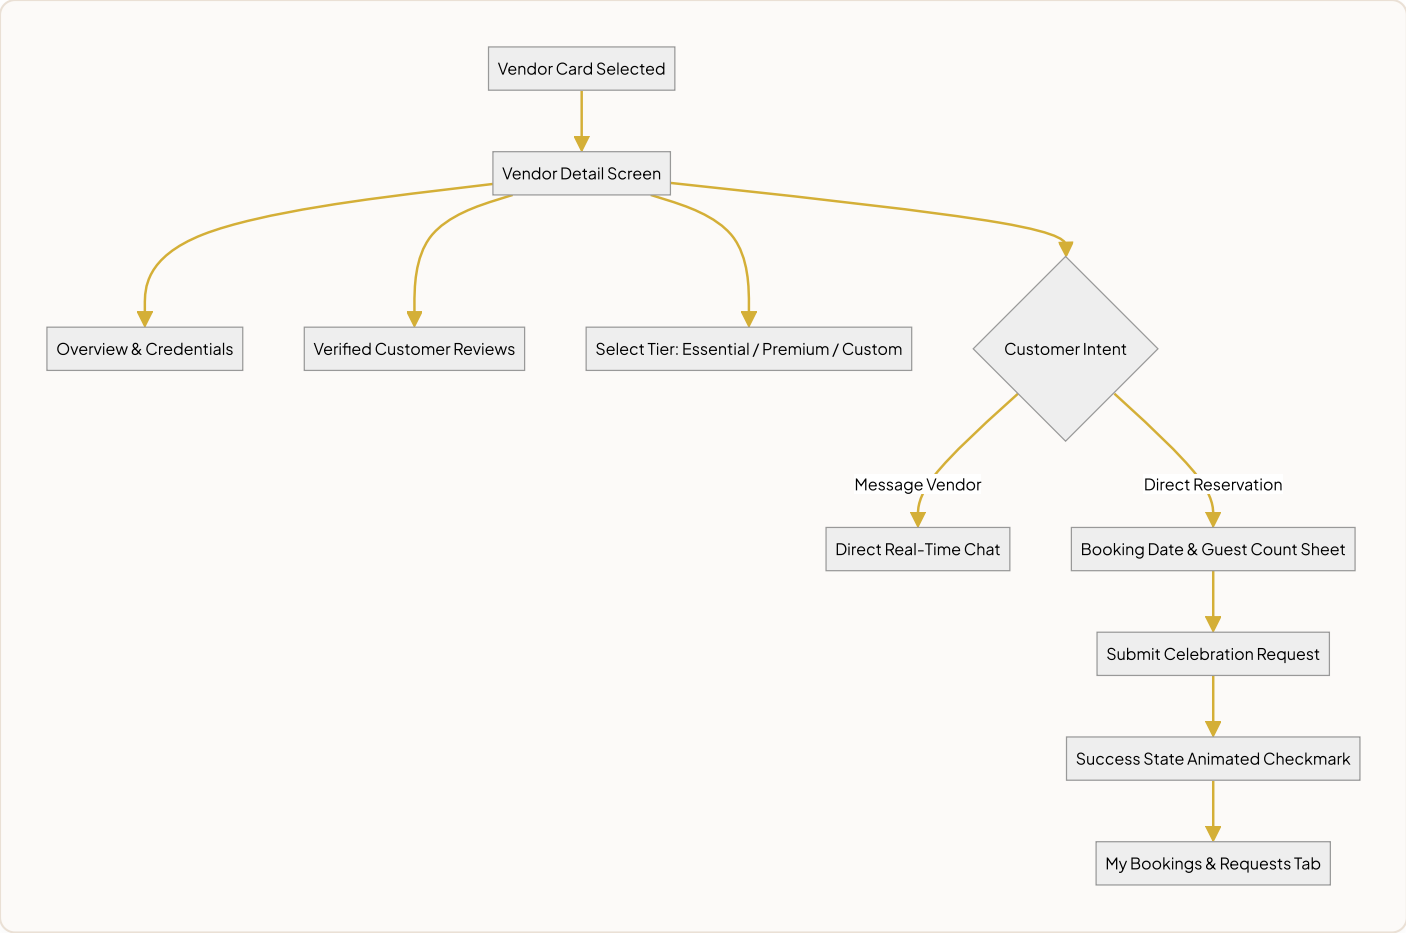

## 4.1 Onboarding & Authentication Flow

App Launch
Splash Screen
Is Token Present in Storage?
No
Login Screen
Custom Auth Action
Enter Phone
Password Login
OTP Verification Screen
Enter Email & Password
Yes
Guest Access
Verify & Sign Code
Authenticate Credentials
Valid
Store API Token & Profile

Home Tab

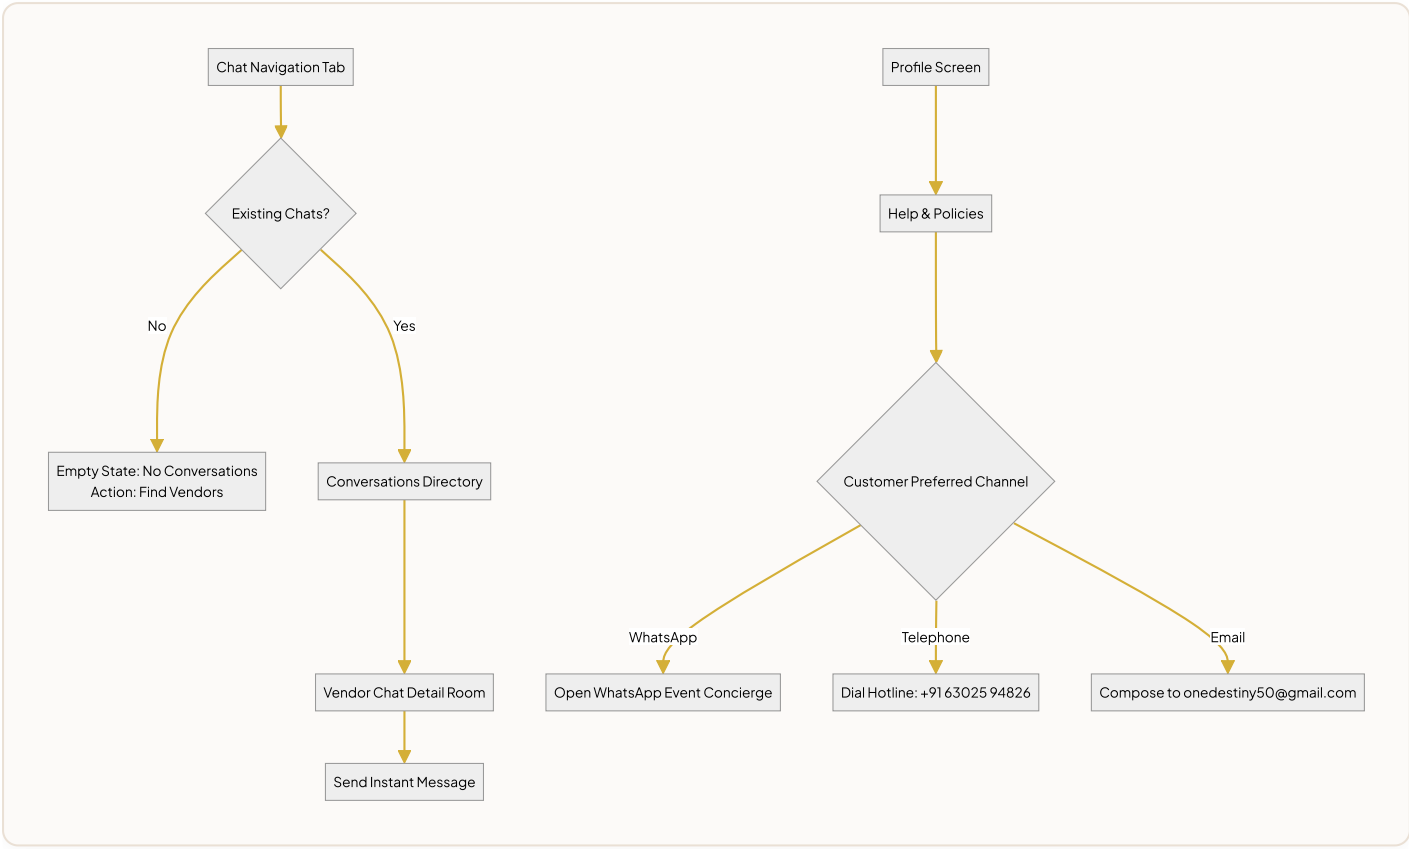

## 4.2 Marketplace Discovery & Filter Flow

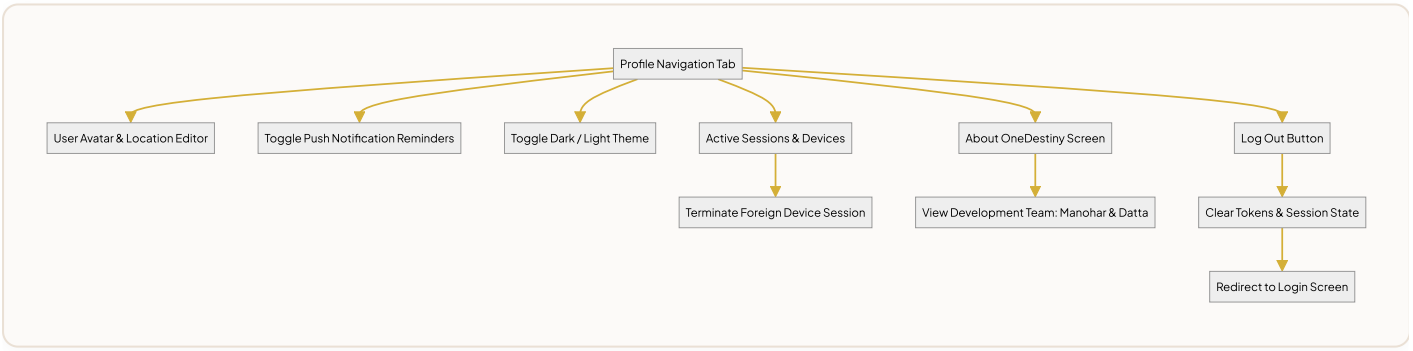

## 4.3 Vendor Selection & Booking Flow

## 4.4 Vendor Communication & 24/7 Concierge Flow

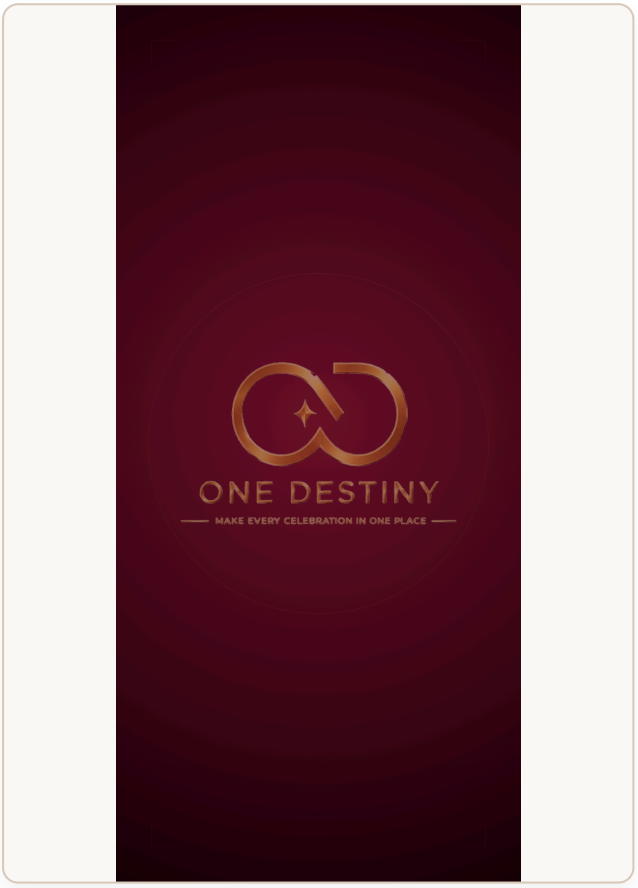

## 4.5 Profile, Active Sessions & Device Security Flow

# 5. Screen-by-Screen Visual Walkthrough

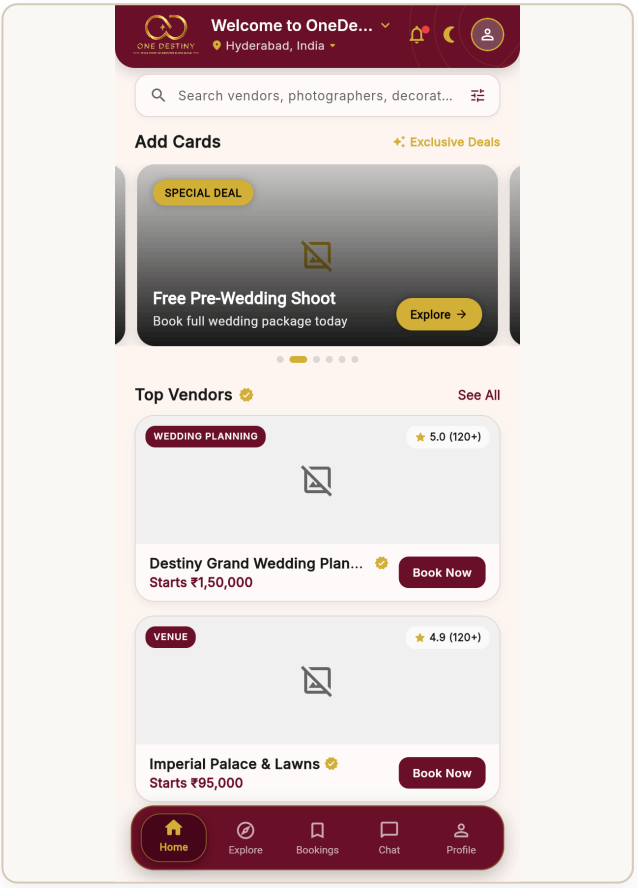

## 5.1 Splash Screen (Brand Identity)

The application opens with a luxury brand reveal featuring the antialiased 3D Gold Logo emblem and the official tagline on deep Imperial Burgundy. The entrance follows a calibrated 2.8s zoom-in ease curve with tap-to-skip support.

**Luxury Splash Screen**

3D Metallic Gold Emblem with zero edge clipping and smooth alpha antialiasing.

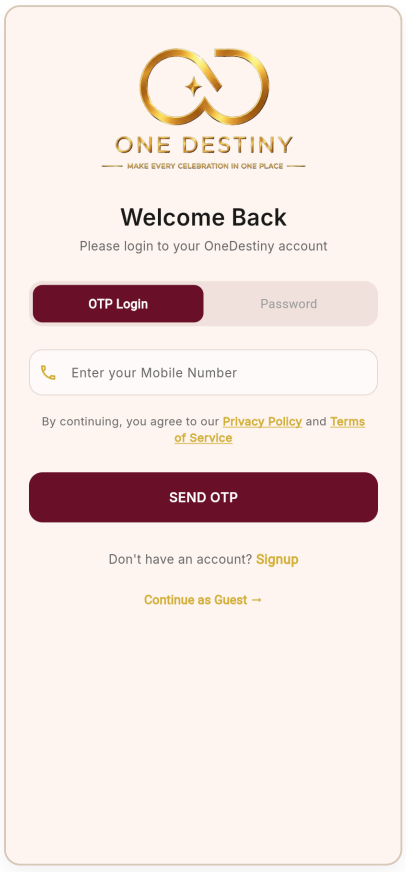

**Marketplace Home Landing**

Imperial Burgundy header, location selector, search bar, and deal carousels.

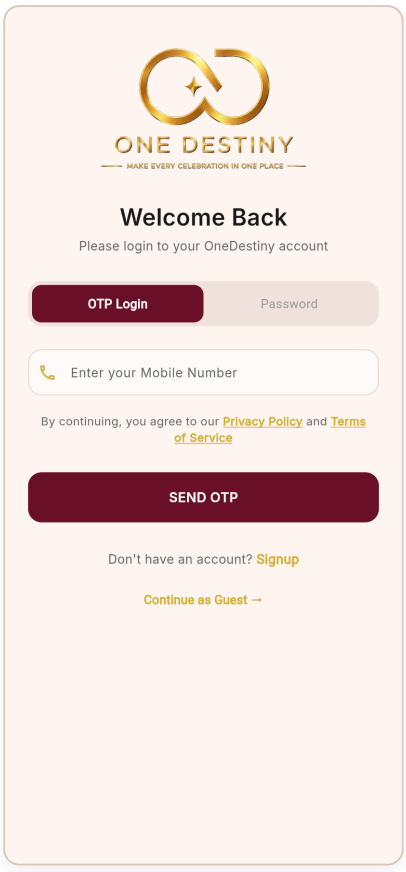

## 5.2 Customer Authentication & Validation States

The authentication hub provides flexible options: OTP phone verification, password credentials, and an instant guest mode. All inputs are monitored by real-time validation feedback.

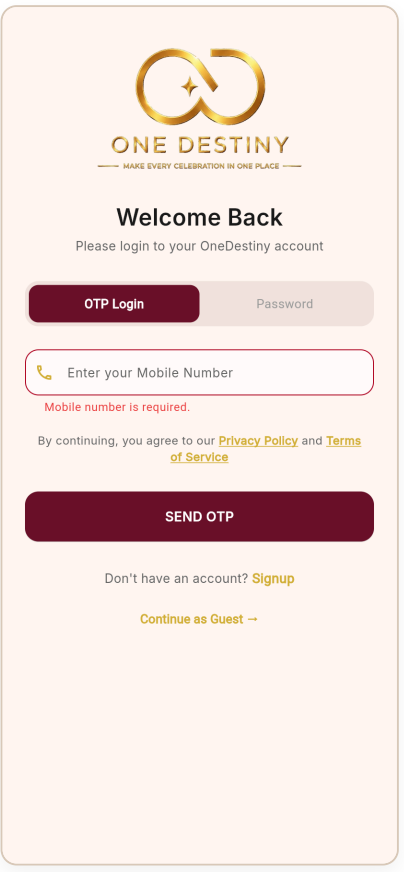

### OTP Login Tab

Phone number input with Terms & Privacy Policy links.

### Password Tab

Alternative email & password credential entry.

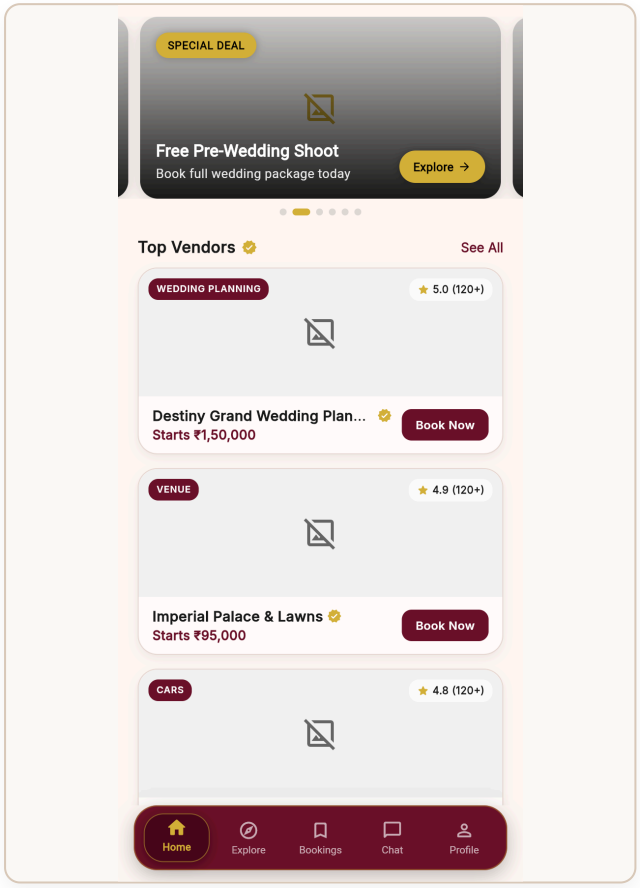

### Form Validation (State 9)

Live red border and message: "Mobile number is required."

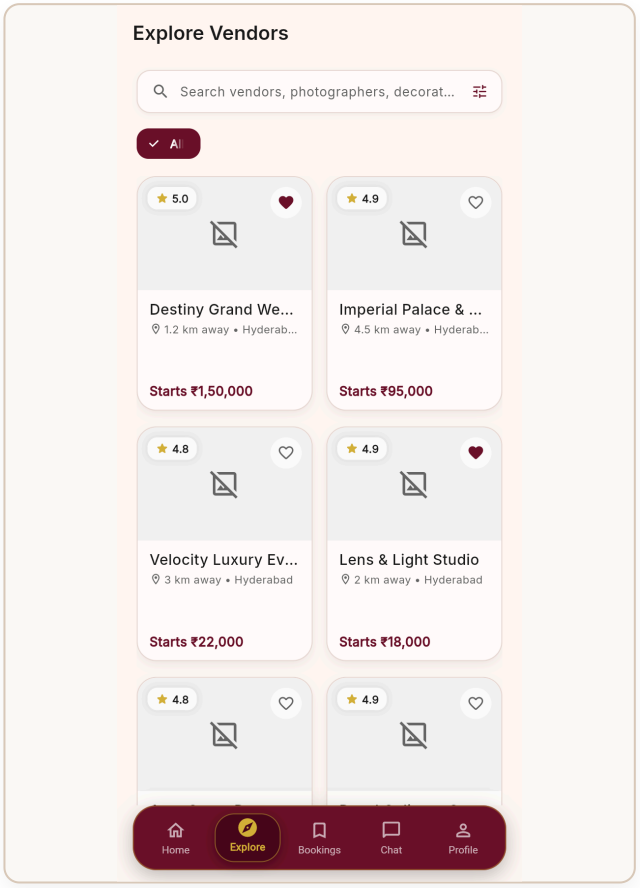

## 5.3 Marketplace Home & Explore Directory

The primary marketplace interface gives customers immediate access to exclusive celebration deals, verified top vendors, and a comprehensive explore grid with category chips.

### Home: Top Vendors Grid

Verified vendor cards with star ratings, starting packages, and instant booking CTAs.

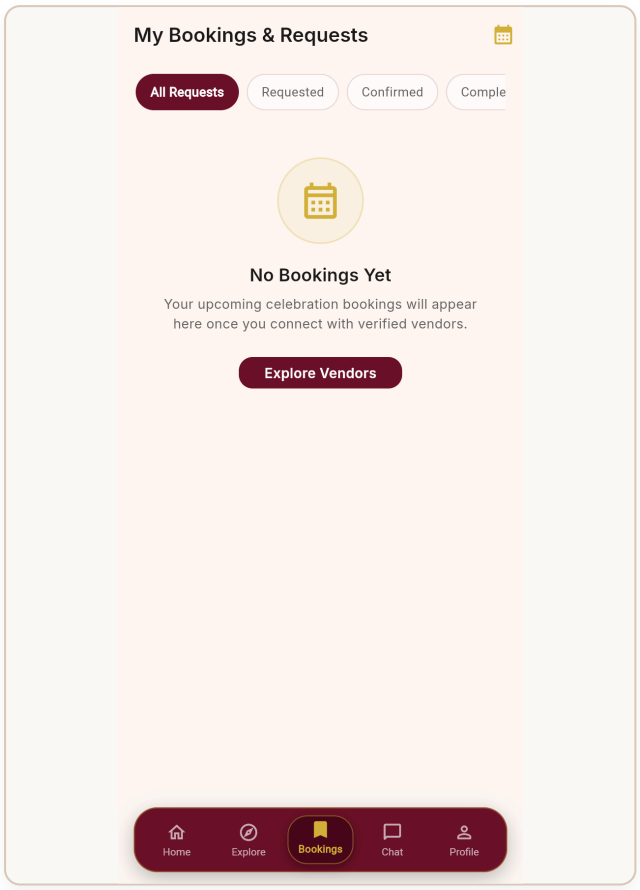

### Explore Vendors Directory

Responsive 2-column vendor grid with category filter chips and favorite toggles.

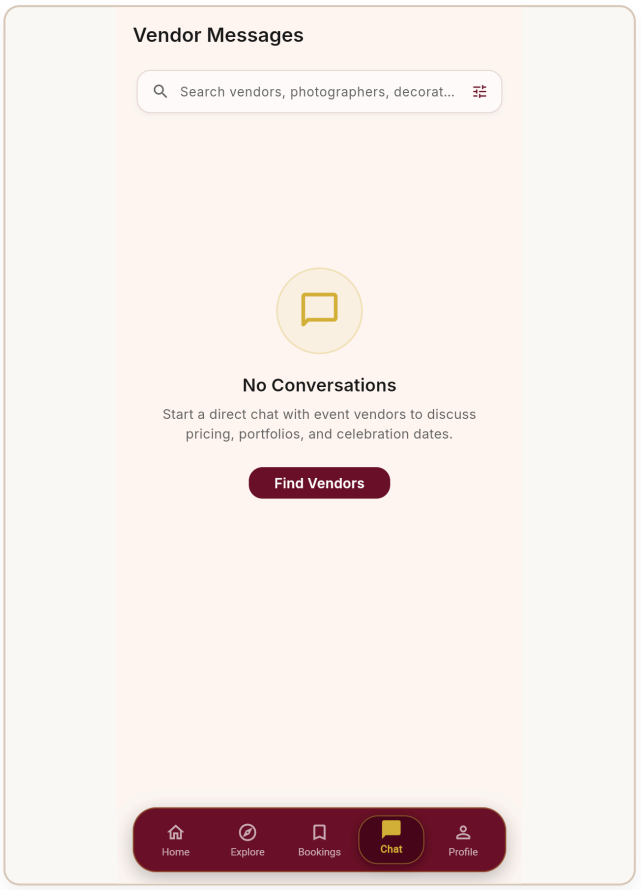

## 5.4 Bookings & Real-Time Vendor Messaging

Customers can monitor the lifecycle of their celebration reservations and maintain direct messaging threads with venue managers and planners.

### Bookings Hub (State 1A: Empty)

Status filter pills with gold celebration calendar illustration and "Explore Vendors" CTA.

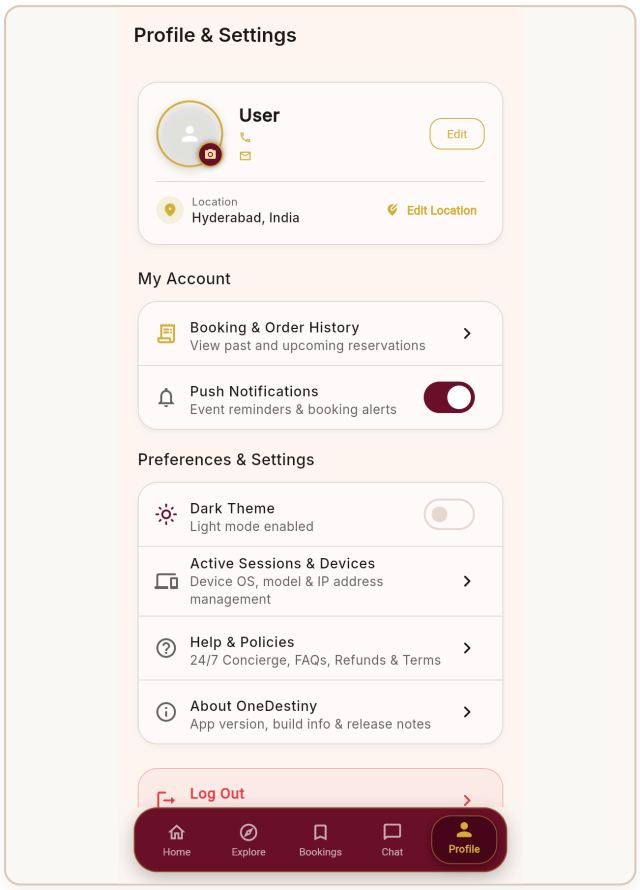

### Vendor Chat Hub (State 1B: Empty)

Direct communication center with "No Conversations" empty state and "Find Vendors" CTA.

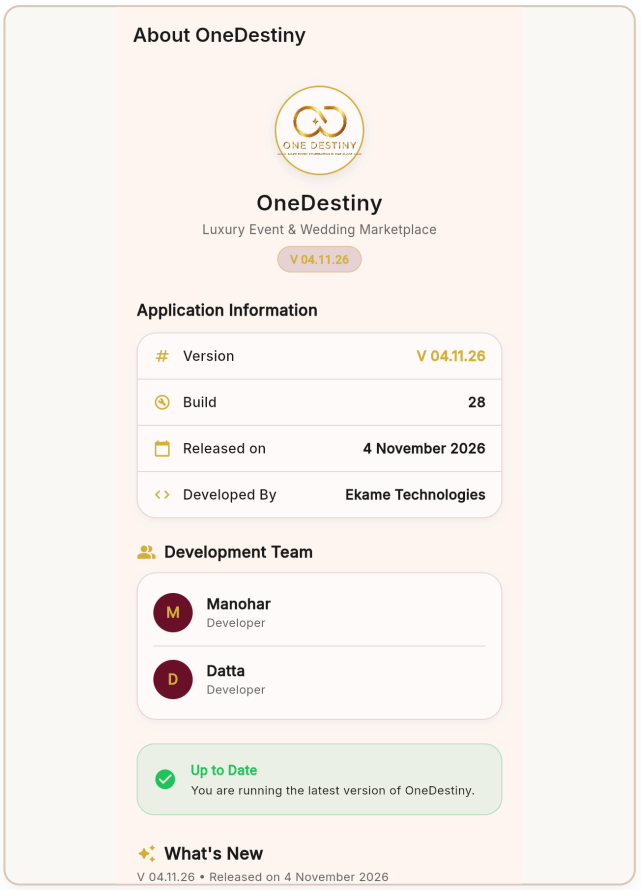

## 5.5 Profile, Settings & Development Team Credits

The Profile Center manages account details, push notifications, and active device sessions. The official **About OneDestiny** screen proudly displays development team attribution.

### Profile & Settings

User avatar, location editor, dark mode toggle, and active session security.

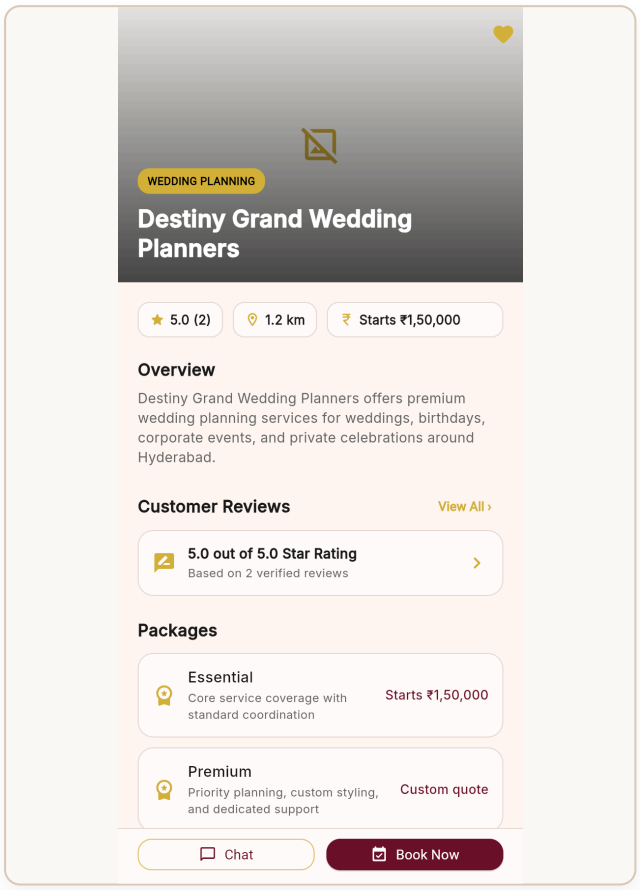

### About OneDestiny & Dev Team

Official release info (Build 28) and credits for **Manohar** and **Datta**.

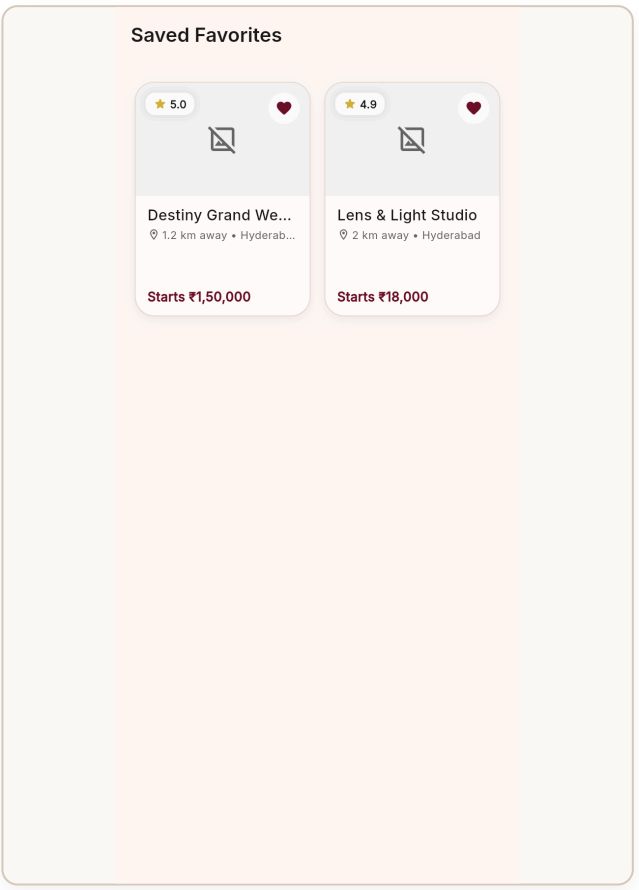

## 5.6 Vendor Detail, Packages & Saved Favorites

Detailed vendor profiles present rich photography, service overviews, verified customer reviews, tiered package options, and direct booking or chat triggers.

### Vendor Profile & Overview

Hero banner, category tag, review rating (5.0), distance (1.2 km), and package tiers.

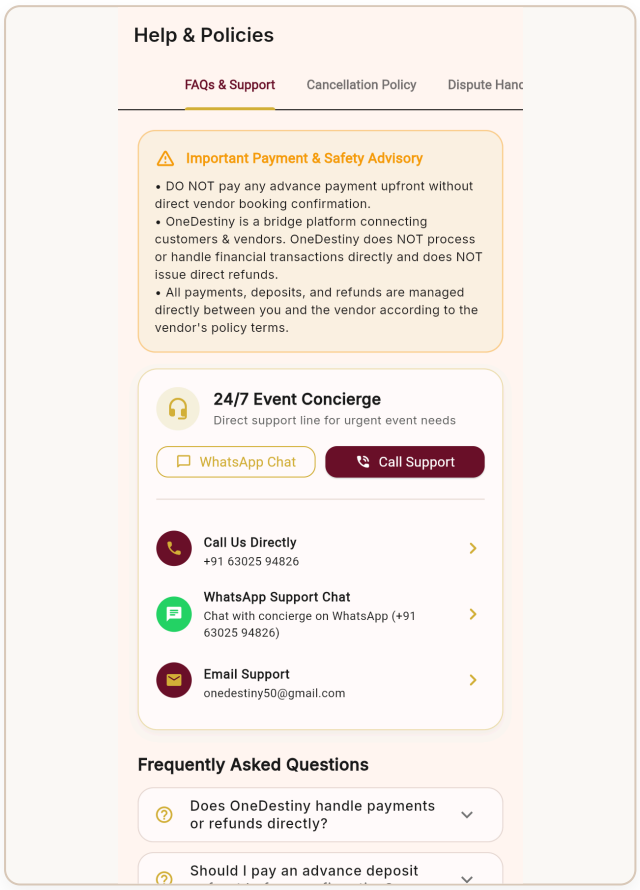

### Saved Favorites Grid

Personal shortlist of bookmarked vendors with instant removal and profile access.

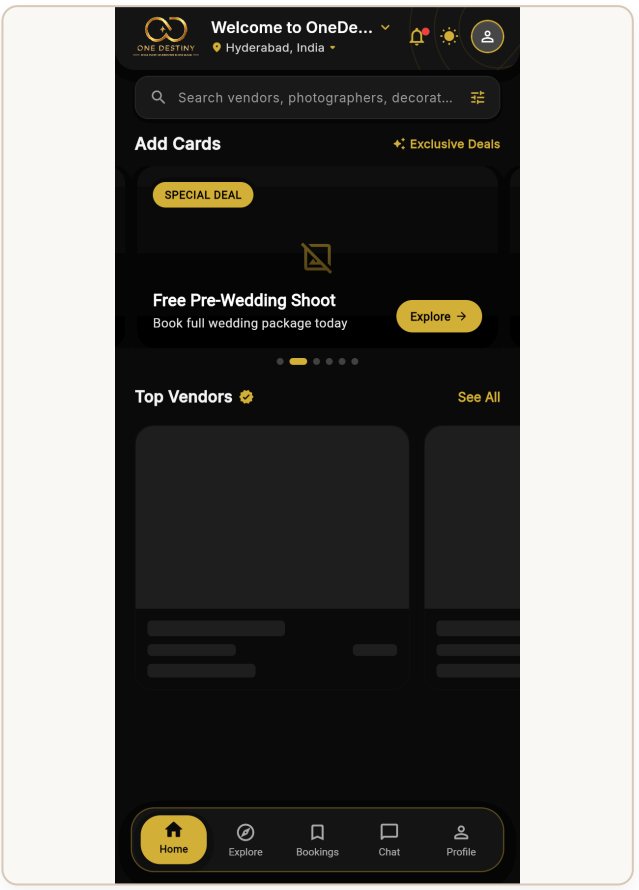

## 5.7 24/7 Event Concierge & Help Policies

OneDestiny provides 24/7 customer safety advisories, FAQs, and multiple immediate communication channels including WhatsApp, telephone, and email support.

### 24/7 Event Concierge

Direct WhatsApp and telephone dialer support (+91 63025 94826) and FAQs.

### High-Contrast Dark Theme

Obsidian black surfaces with champagne gold active navigation pill.

# 6. Data Models & API Contracts

## App Version Configuration (`assets/config/app_version.json`)

```
{
  "version": "04.11.26",
  "build_number": 28,
  "release_date": "2026-11-04",
  "developer": "Ekame Technologies",
  "developers": [
    {
      "name": "Manohar",
      "role": "Developer",
      "url": ""
    },
    {
      "name": "Datta",
      "role": "Developer",
      "url": ""
    }
  ],
  "update_required": false
}
```

# 7. Quality Assurance & Verification Metrics

| Verification Stage | Command Executed | Outcome / Status |
|---|---|---|
| **Static Code Analysis** | `flutter analyze` | **0 issues found!** (Clean analysis across all files) |
| **Automated Test Suite** | `flutter test --no-pub` | **All 34 tests passed!** (100% pass rate) |
| **Web Production Build** | `flutter build web --release` | **Built successfully** (Optimized wasm/canvaskit bundle) |
| **Git Remote Sync** | `git push origin main` | **Up to date** on branch `main` |

**OneDestiny Engineering Team**

Architected & Developed by **Manohar** & **Datta** • Ekame Technologies
